OPERATIONAL DATA

Membrane Type	Mechanical Warranty (year)	Recommended Airflow Rate (Nm ³ /h)	Min-Max Airflow Rate (Nm ³ /h)	Overload (Nm ³ /h)
EPDM	2	2-4	2-4	6
Silicone	2	2-3	2-3	5
TPU	2	2-3	2-3	5

*Performance cannot be guaranteed due to uncertain wastewater characterization and maintenance periods. Mechanical warranty validity is valid under specified operating conditions and maintenance periods.

*The recommended airflow rates at standard operating conditions and design.

*Operating diffusers continuously at max. or min. airflow rate may reduce lifetime or performance. Shutdown of operation is highly recommended for airflow rates lower than the minimum.

*Do not apply overload/maintenance airflow rate (e.g. cleaning) for more than 10 min/day.

*When the air temperature is close to the given max., a lower maximum airflow rate should be used.

PERFORMANCE

*SOTE values depend on the test tank, diffuser density and water height.
